

HRSnap!™ Career Center™

The simplest, fastest, and most affordable way to put your recruiting and applicant tracking on the web

Software So Unique It Has Been Nominated Product of the Year

HRSnap! is so unique it has been nominated as product of the year by a prestigious human resources magazine. Why? Because a single software program runs your recruiting and applicant tracking system *and* has its own web and database server, virtually eliminating costly IT resources and long deployment times. Best of all, HRSnap! software turns a simple PC computer into an advanced Internet Career Center.

Affordable Software You Own

HRSnap! is so affordable that you can *own* it for less than the cost of a single year of an online service. Software is not an expense, but a valuable tool that can likely be used as a capital goods tax writeoff.

HRSnap! Never Looks Out of Place

Other HR solutions don't look like your website, or take costly consulting time and money to make it look like your own. HRSnap! is designed for easy and quick customization, and services to mimic your website look and feel are included with your purchase (for a limited time).

Get Organized, Collaborate, Managers, and Protect Yourself From Legal Threats

HRSnap! puts your entire recruiting process on the web. No more hassels of dealing with walk-in job seekers—send them to your HRSnap! system on the web. Eliminate lost resumes and small, chicken scratch notes made by hiring managers, and *share* applicant info and hiring steps online where your entire staff can view the hiring process. Have a great candidate but no job opening? Store their information online where you can search for it when you do have a position. Protect yourself from legal threats by using a quality process to handle applicants, preventing discrimination and other legal threats arising from lost or improperly handled applicant data.

Your Own Online Career Center Up and Running in a Couple of Days

After customizing the interface to match your own website and organizational branding, enter your essential data, such as locations, hiring managers, and user security. Point the careers link on your website to the PC running HRSnap! and you're ready to post jobs online and start taking applications over the web.

Any Web Browser Can Access Your Career Center

There's a little secret kept by almost every other recruiting system on the market, whether it is software or a service. The secret is that it works only with Internet Explorer. But not HRSnap! We realize that not everyone uses Windows and IE. What if your applicant uses FireFox or Netscape? What if the candidate is a student on a Mac, using Safari or Opera, or an engineer using Mozilla on a Unix or Linux system? HRSnap! works with virtually any web browser.

Everything You Need To Put Your Career Center Online

- HRSnap! is a safe, secure system that virtually eliminates IT costs and resources
- Helps track EEO information
- Instantly put job openings online without the need of a web developer
- Job seekers can upload their cover letter and resume and answer questions you customize
- Eliminate lost emails
- The login recovery system reduces resources if a password is lost
- Hiring managers are notified by email when an applicant has applied for one of their openings
- Hrsnap! guides HR and hiring managers through the hiring steps
